Lab Prerequisites

Following prerequisites and setup must be complete for successful completion of the exercise:

- You must be connected to the internet.
- **Signup for Power BI:** Go to http://aka.ms/pbidiadtraining and sign up for Power BI with a business email address. If you cannot sign up for Power BI, let the instructor know.
- If you have an existing account, please go to http://app.powerbi.com and Sign in using your
 Power BI Account.
- At minimum, a computer with 2-cores and 4GB RAM running one of the following version of Windows: Windows 8 / Windows Server 2008 R2, or later.
- Microsoft Power BI Desktop requires Internet Explorer 10 or greater.
- Verify if you have 32-bit or 64-bit operating system to decide if you need to install the 32-bit or 64-bit applications.
 - Search for computer on your PC, right click properties for your computer.
 - You will be able to identify if your operating system is 64 or 32 bit based on "system type" as shown below.

- Download the Power BI Content: Create a folder called DIAD on the C drive of your local machine.
 Copy all contents from the folder called Dashboard in a Day Assets to the DIAD folder you just created (C:\DIAD).
- **Download and install Power BI Desktop** using any one of the options listed below:
 - o If you have Windows 10, use Microsoft App Store to download and install Power BI Desktop app.
 - Download and install Microsoft Power BI Desktop from http://www.microsoft.com/en-us/download/details.aspx?id=45331.
- Download and install Power BI Mobile App on your mobile device
 - If you are using an Apple product download and install the Microsoft Power BI Mobile app from the Apple store or this link https://apps.apple.com/us/app/microsoft-power-bi/id929738808
 - If you are using an Android product download and install the Microsoft Power BI Mobile app from the Google Play store or this link https://play.google.com/store/apps/details?id=com.microsoft.powerbim

Document Structure

This document is lab 03 of 05 labs in total. The document structure and introduction section can be found in lab 01.

The document flow is in a table format. On the left panel are steps the user needs to follow and in the right panel are screenshots to provide a visual aid for the users. In the screenshots, sections are highlighted with red boxes to highlight the action/area user needs to focus on.

NOTE: This lab is using real anonymized data and is provided by ObviEnce LLC. Visit their site to learn about their services: www.obvience.com.

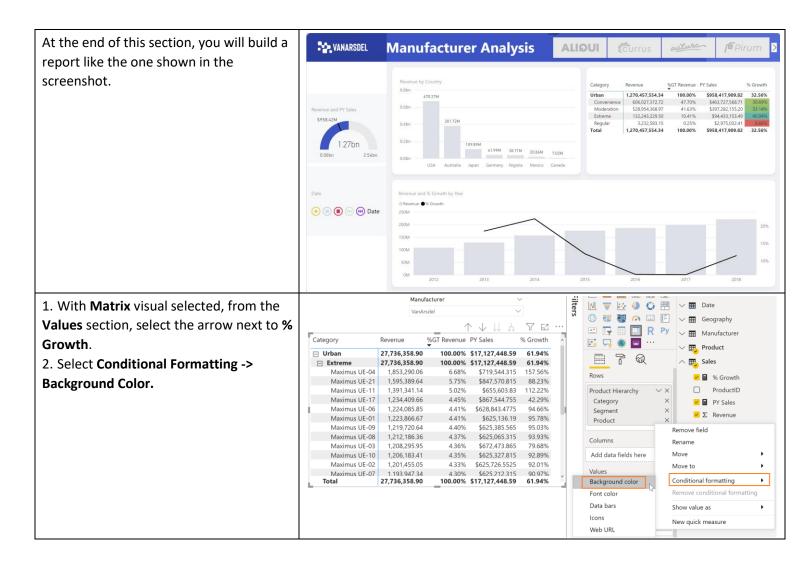

This data is property of ObviEnce LLC and has been shared for the purpose of demonstrating Power BI functionality with industry sample data. Any uses of this data must include this attribution to ObviEnce LLC.

Power BI Desktop

Power BI Desktop – Data Visualization

Having done the data exploration and visualization you have found good insights to share with your team. In this section, you will create a professional report from which you and your entire team can benefit.

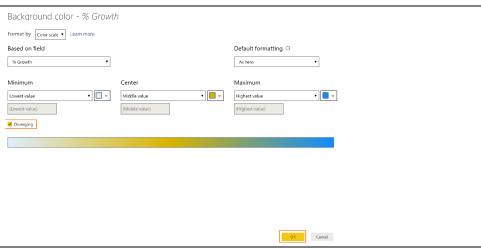

Version: 04.01.2020 Copyright 2020 Microsoft

Background color dialog opens. This dialog provides options to format background color either using rules or diverging colors.

- 3. Select the Diverging checkbox.
- 4. Select OK.

Note: Conditional formatting can also be based on another column using **Color based on** drop down.

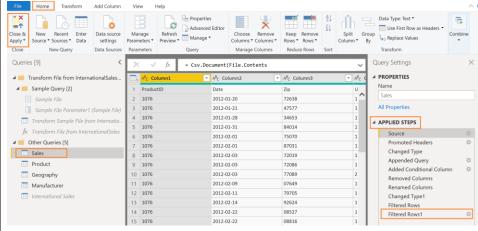

Initially we added a filter to load 3 years of data. Let's load the complete data.

- 5. From the **ribbon**, select **Home -> Transform Data**. Power Query Editor window opens.
- 6. From the left panel, select **Sales** query.
- 7. From the right panel, under **APPLIED STEPS** click on the **X** next to **Filtered Rows** to remove the 3-year filter.
- 8. Select **Home -> Close & Apply** to load the data.
- 9. Sales data is reloaded, this time all the data is loaded. It might take a couple of minutes as we are loading ~7 million rows.

Make sure the report is filtered by VanArsdel using Manufacturer slicer. Remove all other filters.

At this point your report page should look something like the screenshot.

Once data is loaded, notice Revenue by Year visual. You will see columns for years 2012 through 2018.

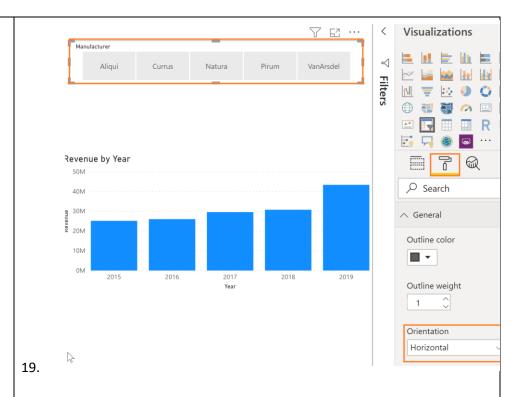

- 11. On the top right corner select the **arrow**.
- 12. Select List.
- 13. in **VISUALIZATIONS** panel select the paint roller icon. This opens the formatting options available for a visual.
- 14. **Expand General** section, select **Horizontal** from the **Orientation** dropdown.
- 15. Notice the Slicer visual is updated. You can **resize** the visual, so all the manufacturers are listed horizontally.

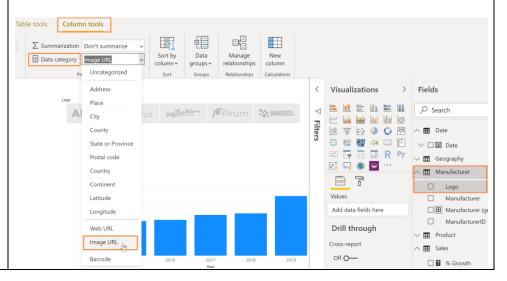

Note: There are other options to change the Outline color, weight, etc.

- 16. Select VanArsdel.
- 17. Collapse General section.
- 18. **Note**: Expand Selection Controls section. Notice there is an option to enable Select All option in the visual. There is also an option to make the slicer multi select. Feel free to explore other formatting options.

It will be nice to add logos of the manufacturer to the slicer. Let's do it.

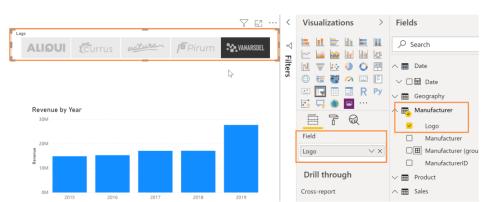

- 20. From **FIELDS** section, select **Logo** field from **Manufacturer** table.
- 21. From the ribbon, select **Modeling** -> **Data Category** -> **Image URL**. Setting data category to Image URL helps Power BI to understand that it is a URL and it can access the data.

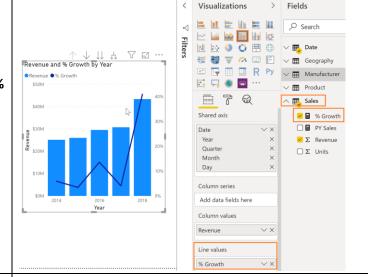

- 23. From **FIELDS** section, drag and drop **Logo** from **Manufacturer** table to Field well.
- 24. Select Logo field.
- 25. Resize slicer visual as needed.
- 26. **Select VanArsdel** logo to filter all the other visuals.

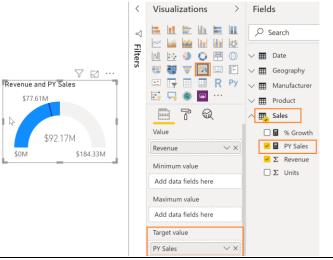

- 27. Select Revenue by Year visual.
- 28. From **VISUALIZATIONS** panel, select **Line and clustered column chart** to change the visual type.
- 29. From **FIELDS** section, drag and drop % **Growth** field from **Sales** table to **Line** values.

This provides a representation of the revenue and growth over time.

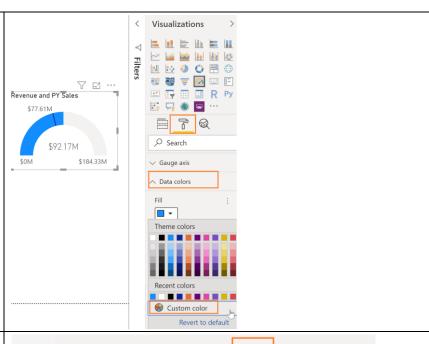

- 30. Select **Revenue Card** visual. Let's change this to a Gauge visual.
- 31. From **VISUALIZATIONS** panel, select the **Gauge** visual.
- 32. From **FIELDS** section, drag and drop **PY Sales** field to **Target value**.

Resize the visual as needed. Now we can compare Revenue with the target.

It will be nice to change the colors on the visuals.

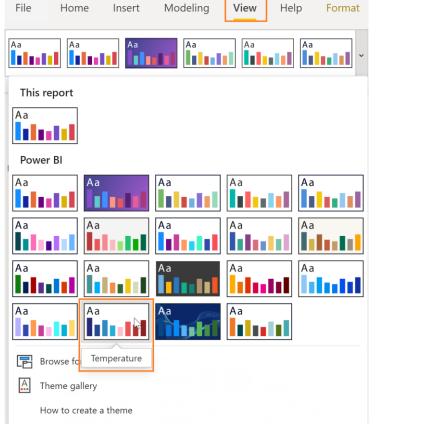

- 33. Select Gauge visual.
- 34. From **VISUALIZATIONS** panel, select **paint roller** icon.
- 35. Expand Data Colors section.
- 36. Select the arrow next to Fill color.
- 37. Notice you can pick a color from the default color palette or pick Custom colors.

Let's check out some of the themes available.

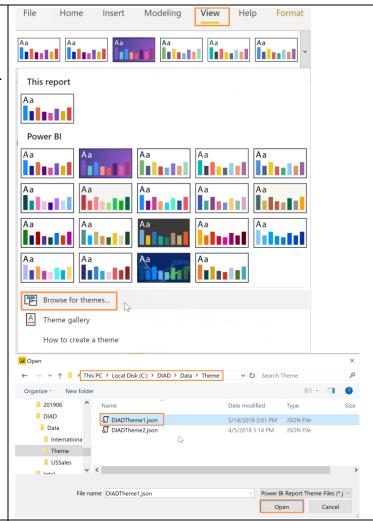

38. From the ribbon, select **View -> Themes -> Temperature**.

Notice colors on all the visuals updated. Feel free to try the other out of the box themes.

Marketing department has provided standard color themes to be used across reports. We can use Report Theme feature in Power BI by uploading a theme. Report Theme requires a JSON file where the data colors, background, foreground and table Accent colors are defined. The JSON file can be used across all the reports.

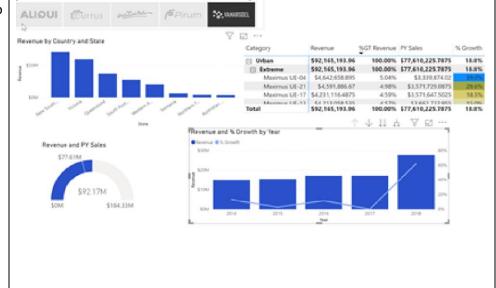

39. From the ribbon, select **Home -> Themes -> Browse for themes...**

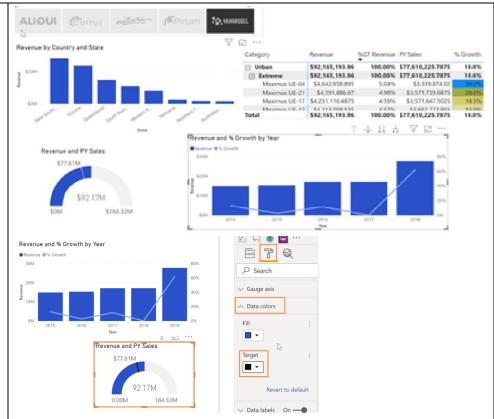

- 40. File browser dialog opens. Navigate to /Data/Theme folder.
- 41. Select **DIADTheme2** file and select **Open**.
- 42. Once theme is imported, a success dialog opens. Select **Close**.

Notice colors on all the visuals updated. Your report should look something like the screenshot at this point. This theme looks good. Now most of the visuals are blue in color, let's add some contrast.

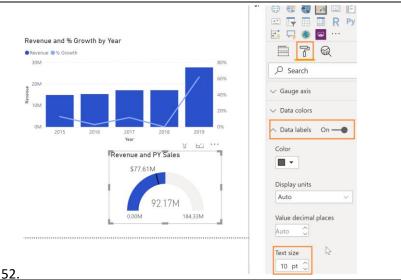

Note – Here you can save and add your own custom themes

- 43. Select the **Gauge** visual.
- 44. From **VISUALIZATIONS** panel, select **paint roller** icon.
- 45. Expand **Data colors** section.
- 46. Select the drop down next to **Target**. Notice the color palette is different now. Select **black** color. Notice the change in the visual.

- 47. Collapse Data colors section.
- 48. Expand Data Labels section.
- 49. Increase **Text size** to **10**.
- 50. Expand **Target** section.
- 51. Increase **Text size** to **10**.

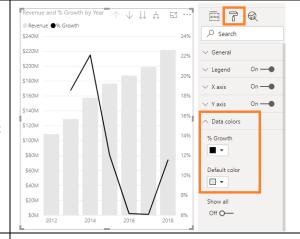

- 54. Drill up to **Segment** level.
- 55. Select Revenue by Country visual.
- 56. Drill up to Country level.
- 57. From **VISUALIZATIONS** panel, select **paint roller** icon.
- 58. Expand **Data colors** section.
- 59. Select a light shade of **gray** as the **Default color**.
- 60. Enable and expand **Data labels**.
- 61. Change Display units to Millions.
- 62. Notice there a lot of formatting options. E.g. visual title can be changed and formatted, you can add a border and background to the visual, etc. Feel free to explore the options.
- %GT Revenue PY Sales % Growth 🤯 👹 😇 🙉 🖾 📳 □ Urban \$92.165.193.96 100.00% \$77.610.225.7875 18.8% ■ R Py \$92,165,193,96 100.00% \$77,610,225.7875 18.8% Maximus UE-04 \$4,642,658.895 \$3,339,874.02 5.04% 📑 📮 🍘 🐷 … Maximus UE-21 \$4,591,886.67 4.98% \$3,571,729.0875 Maximus UE-17 \$4,231,116.4875 4.59% \$3,571,647,5025 **7** 100.00% \$77,610,225,7875 \$4 212 058 535 \$92,165,193.96 ○ Search ♠

 ↑↑

 ↑ Revenue by Country and State ∧ Data colors \$23.79M Default colo \$20M ■ • Off O-Revert to default Data labels On — Color **-**Display units Millions
- 63. Select **Revenue and % Growth by Year** visual.
- 64. From **VISUALIZATIONS** panel, select **paint roller** icon.
- 65. Expand **Data colors** section.
- 66. Select **black** color for **% Growth**. Select a light shade of **gray** as the **Default Column color**.

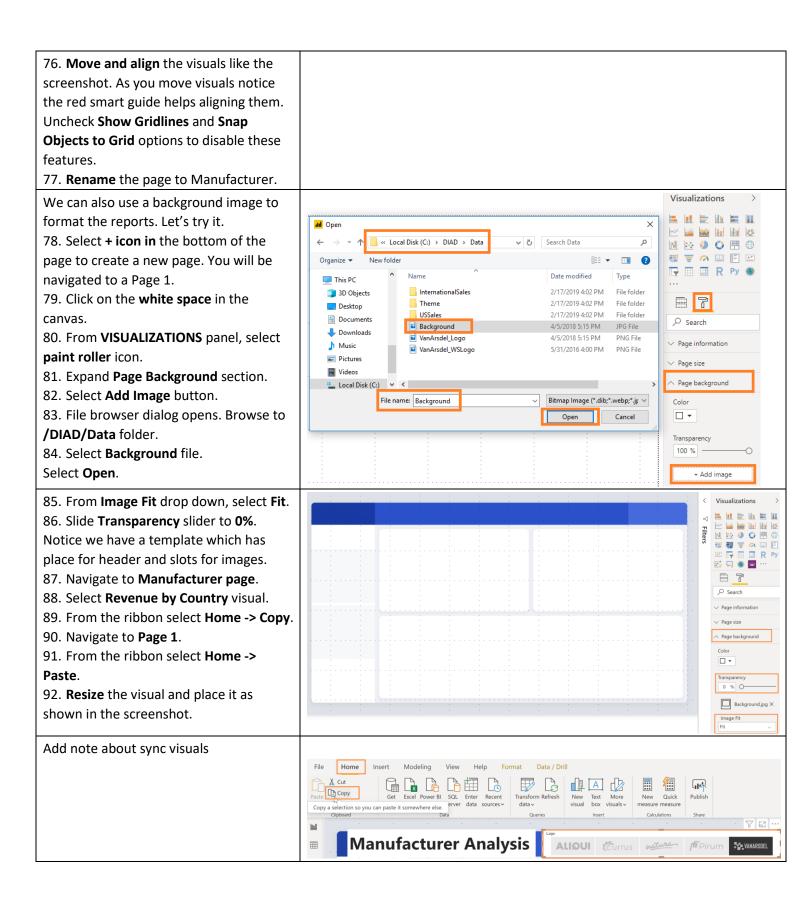

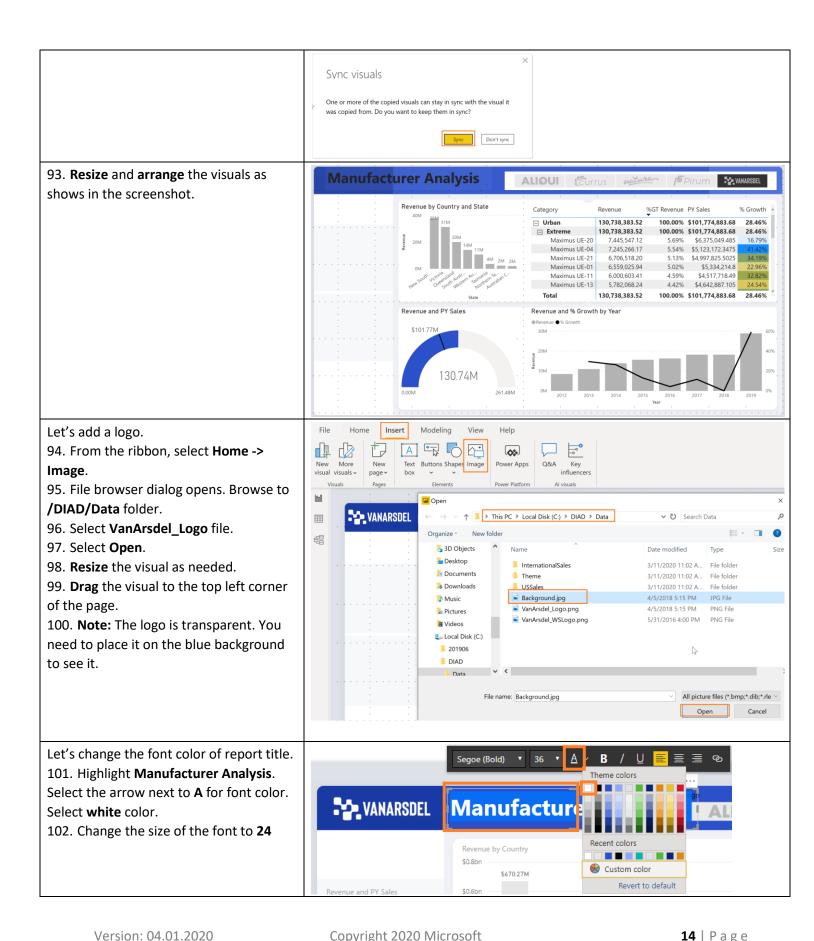

Let's add a report title.

- 67. From the ribbon, select **Home -> Text box**. Notice a text box visual is added.
- 68. Resize the visual as needed.
- 69. Enter **Manufacturer Analysis** in the Text box.
- 70. **Highlight** Manufacturer Analysis to format the text.
- 71. Select **Segoe (Bold)** as the **font**.
- 72. Select **36** as the **font size**.
- 73. Resize the text box as needed.
- 74. From the **ribbon**, select **View**.
- 75. Select the checkbox next to **Show Gridlines** and **Snap Objects to Grid**. This will help with aligning the visuals.

Out of the box, Power BI has a good selection of visuals. However, there is always a use-case where you need a custom visual. To meet this need, the visualization engine is open sourced. Power BI community contributes visuals which are available in the marketplace. You can add and use these visuals in your reports.

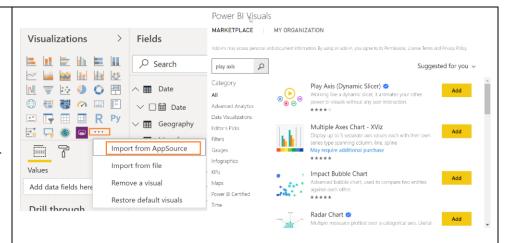

There is also an option to create your own visual and import it into Power BI Desktop.

Let's add a custom visual.

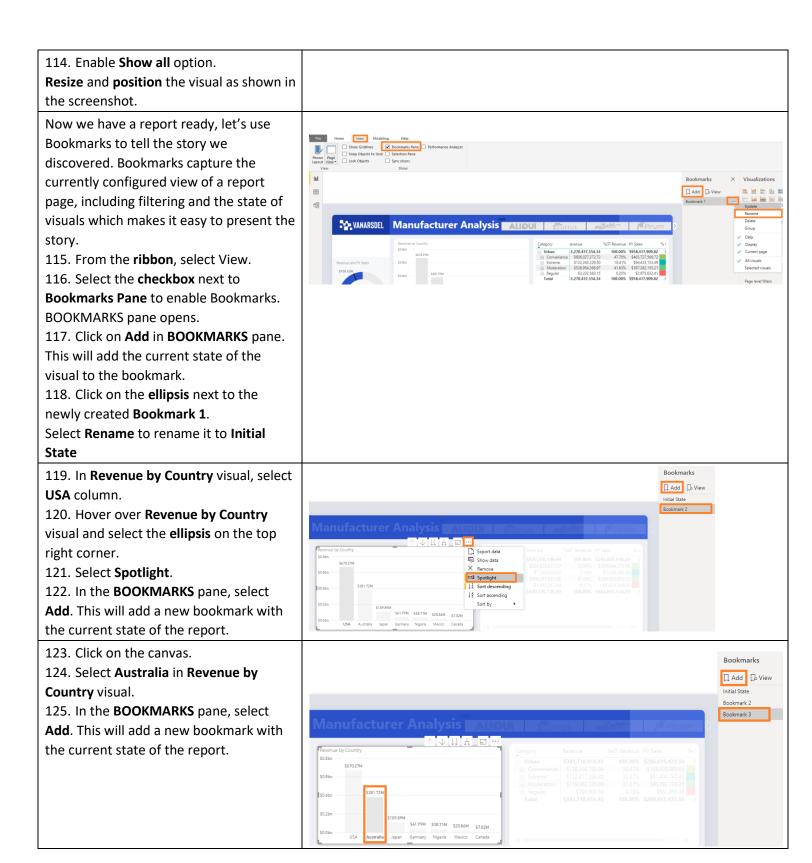

- 103. From **VISUALIZATIONS** section, select the ellipsis in the last row of visuals.
- 104. Select Import from marketplace.
- 105. Type **play axis** in the **search box** and select search.
- 106. Select Add next to Play Axis (Dynamic Slicer).

Note: Notice the checkmark in the blue star. This sign is used to identify certified custom visuals. Custom visuals that meet Power BI teams coding requirements are certified. Certified custom visuals support features like export to Power Point, ability to display in subscription emails which is not supported by non-certified custom visuals.

- 107. Import custom visual dialog opens. Select **OK**.
- 108. Notice a new visual is added to the list of available visuals.
- 109. Click on the **white space** in the canvas.
- 110. From **VISUALIZATIONS** section, select the newly imported **Play Axis** visual.
- 111. From **FIELDS** section, click the checkbox next to **Date** field in **Date** table.
- 112. From **VISUALIZATIONS** panel, select **paint roller icon**.
- 113. Expand Colors section.

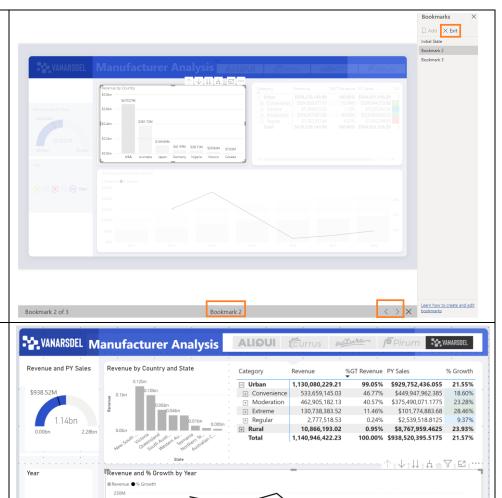

126. From the **BOOKMARKS** pane, select **View**. You are in Bookmarks slide show mode.

You will be in the first bookmark which we called Initial State. Notice on the bottom of the report pane there is an option to navigate between bookmarks. 127. You can use the **arrows** to navigate between bookmarks and tell your story. 128. From **BOOKMARKS** pane, select **Exit** to exit Bookmarks slide show mode.

129. If time permits, feel free to explore other options available with Bookmarks like Selected Visuals and more as you continue to build the story.

- 130. From the ribbon, select **View**.
- 131. Uncheck Bookmarks Pane.
- 132. Collapse the Visualizations and Filters pane by clicking on the arrows. Report should look as shown in the figure. Save the file.
- 133. Select File -> Save.

You have built your first report!!!

You have successfully completed the hands-on lab in creating a report to share to your team. The next section covers creating a dashboard from this report so that you can easily share it to your team. You have learned a quick overview of various functionality in Power BI Desktop to get accelerated. There are a lot more features for you to build upon this on your own data.

► III III III III III Year

By using this demo/lab, you agree to the following terms:

The technology/functionality described in this demo/lab is provided by Microsoft Corporation for purposes of obtaining your feedback and to provide you with a learning experience. You may only use the demo/lab to evaluate such technology features and functionality and provide feedback to Microsoft. You may not use it for any other purpose. You may not modify, copy, distribute, transmit, display, perform, reproduce, publish, license, create derivative works from, transfer, or sell this demo/lab or any portion thereof.

COPYING OR REPRODUCTION OF THE DEMO/LAB (OR ANY PORTION OF IT) TO ANY OTHER SERVER OR LOCATION FOR FURTHER REPRODUCTION OR REDISTRIBUTION IS EXPRESSLY PROHIBITED.

THIS DEMO/LAB PROVIDES CERTAIN SOFTWARE TECHNOLOGY/PRODUCT FEATURES AND FUNCTIONALITY, INCLUDING POTENTIAL NEW FEATURES AND CONCEPTS, IN A SIMULATED ENVIRONMENT WITHOUT COMPLEX SET-UP OR INSTALLATION FOR THE PURPOSE DESCRIBED ABOVE. THE TECHNOLOGY/CONCEPTS REPRESENTED IN THIS DEMO/LAB MAY NOT REPRESENT FULL FEATURE FUNCTIONALITY AND MAY NOT WORK THE WAY A FINAL VERSION MAY WORK.

Version: 04.01.2020 Copyright 2020 Microsoft **18** | Page

WE ALSO MAY NOT RELEASE A FINAL VERSION OF SUCH FEATURES OR CONCEPTS. YOUR EXPERIENCE WITH USING SUCH FEATURES AND FUNCITONALITY IN A PHYSICAL ENVIRONMENT MAY ALSO BE DIFFERENT.

FEEDBACK. If you give feedback about the technology features, functionality and/or concepts described in this demo/lab to Microsoft, you give to Microsoft, without charge, the right to use, share and commercialize your feedback in any way and for any purpose. You also give to third parties, without charge, any patent rights needed for their products, technologies and services to use or interface with any specific parts of a Microsoft software or service that includes the feedback. You will not give feedback that is subject to a license that requires Microsoft to license its software or documentation to third parties because we include your feedback in them. These rights survive this agreement.

MICROSOFT CORPORATION HEREBY DISCLAIMS ALL WARRANTIES AND CONDITIONS WITH REGARD TO THE DEMO/LAB, INCLUDING ALL WARRANTIES AND CONDITIONS OF MERCHANTABILITY, WHETHER EXPRESS, IMPLIED OR STATUTORY, FITNESS FOR A PARTICULAR PURPOSE, TITLE AND NON-INFRINGEMENT. MICROSOFT DOES NOT MAKE ANY ASSURANCES OR REPRESENTATIONS WITH REGARD TO THE ACCURACY OF THE RESULTS, OUTPUT THAT DERIVES FROM USE OF DEMO/ LAB, OR SUITABILITY OF THE INFORMATION CONTAINED IN THE DEMO/LAB FOR ANY PURPOSE.

DISCLAIMER

This demo/lab contains only a portion of new features and enhancements in Microsoft Power BI. Some of the features might change in future releases of the product. In this demo/lab, you will learn about some, but not all, new features.
